

Person ID	Problem	App/Website found	Likes	Don't Likes	Improvements
1	Inventory loss. Grocery store deals with fragile inventory every day such as fruits prone to spoilage or boxes getting damaged	Grocery Delivery App	Ability to provide numerous payment options	Missing or receiving the wrong items.	There should be easier product search and discovery.
2	Requesting too many permissions	Travel app	We can make all the booking from anywhere through our mobile itself	To access the app we need to have high speed network and even while doing the payments also we need high speed network.	It should be improved in providing features like geolocation tracking services, social media sharing etc.
3	It's not transparent about how it makes money	Investment app	By using this we can place our investment orders anytime and anywhere	The brokerage commissions kill profit margins	They need to rebalance regularly and also need to find lower cost ways to invest
